

Retired Recall Info:

1. Typical window for retire recall (RR) of a Reserve or Active Duty retiree is no more than 5 yrs from retirement. There have been some with critical skills that have been recalled who exceeded 5 yrs.
2. Key to any recall is finding a unit that can justify recalling a retiree. Typical retired recalls are: Officers with a high demand/low density MOS or valuable other civilian or military experiences. In the justification the Unit/Command must be able to explain they have exhausted finding an Active Duty and Reserve sourcing solution.
3. Most MFR Retiree Recalls come via SMCR unit activation. It is harder to find an existing IA billet for a RR. It's not impossible, but harder since MFR has limited IA billets. Now if the retire wants to canvas the other MarFor's- send him the other MarFor G-1 POC's. MFR only processes RR for MFR Units.

4. Processes:

- a) A unit is found that will justify a RR request.
- b) The unit must create an RTN that contains:
 - Summary of billet tasks
 - detailed rationale for the billet based on CMC or Combatant Commander task.
 - list efforts made to accomplish task/duties with onhand, Active and/or reserve manpower.
 - Give name of GO or COS that validates this requirement.
- c) Retiree initiates an AA form volunteering for RR.
- d) Command must forward endorsements justifying recalling the Marine (skills, experience).
- e) Estimated time frame from receipt of RTN build up and Command Endorsement to Active duty orders for the RR is estimated at 6 weeks.
